# A FUSION OF FASHION AND ART

This luxurious easy-wear collection comes from my love for fashion and textiles, combined with my art.

I spent the past year developing this slow fashion collection and it's been a wonderfully creative journey. I'm very excited to send it out into the world!

Each garment is an **art piece** that is **uniquely handcrafted**. Every colour carries a specific energy vibration and is intentionally chosen for each individual piece. I also use the colours of specific seasons to guide my choices.

The garments' design styles can thus be duplicated, but not the colours and hand-dyed patterns. The only exception to this is the printed kimono range. This catalogue displays a limited number of the garments available. You are welcome to contact me to view whatever else is on the rack at the time.
